SUMMARY

CompTIA A+ certified Computer Systems student at CUNY New York City College of Technology (BTech expected May 2027) with an AAS in Computer Information Systems. Runs a self hosted Proxmox homelab with DNS, reverse proxy, internal TLS, backups, and monitoring with alerting. 4+ years of daily technical troubleshooting at T-Mobile. Preparing for the Cisco CCNA. Seeking an entry level role in IT support, network operations, or systems administration. Bilingual in English and Spanish.

TECHNICAL SKILLS

Virtualization & Cloud: Proxmox VE, Docker, Portainer, Hyper-V, VMware, VirtualBox, AWS (EC2, S3, VPC)

Networking: TCP/IP, DNS, DHCP, VLANs, inter-VLAN routing, OSPF, RIP, reverse proxy (Nginx Proxy Manager), Cisco Packet Tracer

Systems & Servers: Windows Server, Active Directory (AD DS), Group Policy, Linux, Apache, Pi-hole

Security & Monitoring: Wireshark, Nmap, tcpdump, Uptime Kuma, internal PKI and TLS (mkcert), access control lists

Scripting & Programming: PowerShell, Python, SQL, Java, JavaScript, HTML/CSS

PROJECTS

Proxmox Homelab | *Proxmox VE, Docker, Pi-hole, Nginx Proxy Manager, Uptime Kuma*

2026

- Built a Proxmox VE server hosting an LXC container and a Docker host VM, with scheduled snapshot backups.
- Deployed Pi-hole for network DNS and Nginx Proxy Manager as a reverse proxy, giving each service an internal hostname over HTTPS.
- Created a private certificate authority with mkcert, trusted it on Windows and macOS clients, and restricted the Proxmox admin UI with an IP allow list and authentication.
- Configured Uptime Kuma monitoring with Discord alerts; diagnosed and resolved real outages, including certificate trust failures fixed within 6 minutes.
- Documented the build with a network diagram and troubleshooting log at github.com/avalletech/homelab.

Active Directory & Virtualization Lab | *Hyper-V, Windows Server, AD DS, AWS EC2*

- Promoted a Windows Server VM to Domain Controller with AD DS, DNS, and DHCP, and joined a Windows 10 client to the domain.
- Created OUs, users, and security groups with role based access, applied Group Policy Objects, and provisioned AWS EC2 instances with SSH and RDP access.

Network Topology Lab | *Cisco Packet Tracer*

- Designed and simulated LAN/WAN topologies with multiple subnets, VLANs, inter-VLAN routing, and OSPF/RIP; diagnosed connectivity failures end to end.

Additional Labs | *Wireshark, tcpdump, Nmap, Apache, Python*

- **Traffic analysis:** captured live traffic with Wireshark and tcpdump, filtered by protocol, and flagged anomalous patterns.
- **Web server:** configured Apache with virtual hosts, directory permissions, and basic authentication.
- **Automation:** wrote Python scripts for a file organizer, a startup app launcher, and a subnet calculator.

PROFESSIONAL EXPERIENCE

Mobile Expert | T-Mobile, Queens, NY

March 2022 – Present

- Resolved escalated technical issues involving device configuration, accounts, and mobile service.
- Diagnosed hardware and software faults across Android and iOS devices; coordinated warranty replacements and network provisioning.
- Explained technical problems and service configurations clearly to nontechnical customers.

CERTIFICATIONS

CompTIA A+, CompTIA

August 2026

Cisco Certified Network Associate (CCNA), Cisco

In Progress, target January 2027

Cisco Packet Tracer series (Getting Started, Exploring Networking, Exploring IoT), Cisco Networking Academy

2026

Information Security Basics (AWR-173), TEEX / FEMA, Department of Homeland Security

May 2021

EDUCATION

Bachelor of Technology in Computer Systems, CUNY New York City College of Technology

Expected May 2027

Associate of Applied Science in Computer Information Systems, CUNY New York City College of Technology

May 2025
